NAICS: 518210, 541511, 541519, 541512, 511210, 334111, 611430

Capability Statement

Core Competencies:

Inspire IT Solutions can help organizations gain insights into their data, by helping them create state of the art Business Intelligence / data warehousing solutions.

- 1. Business Analysis:**
Help organizations with gathering requirements for the projects, create business requirement documents (BRD's) etc
- 2. Data Analysis**
Help organizations profile data, create ad hoc reports, create any data lineage documents, create any mapping documents to be used in BI Projects. Also build any predictive / forecasting models to support Business requirements.
- 3. Data Warehouse Architecture**
Create denormalized data models in the data warehouse environments by understanding the grain. These Models will help create business intelligence solutions to be used by the organization.
- 4. ETL (Extract Transformation Loading) Programming**
Programming using tools such as Informatica to extract data from the source system and transform, load into tables in data warehouse used for BI and reporting needs.
- 5. Quality Engineering**
QE services to perform manual/automatic testing to make sure the solution meets the documented requirement.
- 6. Project Management**
Project management support to make sure project gets done on time with in budget and meeting all the requirements.
- 7. Production Support**
Production support services such as Database administration to make sure, organization's infrastructure runs smoothly.
